Dear Colleagues and friends,

The Belgrade Anesthesia Congress 2014 Organising Comitee and the Serbian Association of Anesthesiologists and Intensivists (SAAI) welcome you as our guests to the XII Serbian Congress of Anesthesiologists and Intensivists.

The XII Serbian Congress of Anesthesiologists and Intensivists is an international and the largest anesthesia meeting in this part of Europe. You will have opportunity, to meet experts in different anesthesiology fields, to share your experience with colleagues and visit industry symposia.

Beside educational values, the XII Serbian Congress of Anesthesiologists and Intensivists is a unique opportunity to visit Belgrade. Belgrade, as one of the most popular touristic destination in Europe, offers many overwhelming experiences: Kalemegdan old castle, Ada Ciganlija, natural park in the city, memorable night life on riversides, great food, beautiful people and many more. We hope that you will enjoy during your stay.

We look forward to seeing you in Belgrade!

Predrag Romić, MD, PhD
President of Serbian Association of Anesthesiologists and Intesivists
President of the Organising Comitee

Dear Colleagues,

On behalf of the Scientific Comitee, it is an honor to welcome you to XII Serbian Congress of Anesthesiologists and Intensivists, or as we called it Belgrade Anesthesia Congress 2014. For over the years, Serbian anesthesiology is developing and trying to keep up to date, which is not an easy task in rather challenging times. Our objective was to provide an opportunity to hear experts on different topics, to encourage interaction with other clinicians, and promote work of our residents who are and will be the future of Serbian anesthesiology.

All plenary sessions are chosen from broad range of anesthesiology topics in order to increase our knowledge and fill in practice gaps in some of the most challenging problems. A number of round tables are organized with a help of pharmaceutical companies, as an idea to present and discuss problems with experienced clinicians. Resident`s contest "Final four!" is organized for the first time in this region, giving the opportunity to junior anesthesiologists to show their skills in presenting some of the anesthesia challenging cases. Hands-on workshops, as a part of pre-congress activity are opportunity for participants to improve skills and clinical competence in difficult airway, ultrasound use in anesthesia and intensive care and regional anesthesia. Moreover, we host Committee for European Education in Anaesthesiology (CEEAA) and their final course in Serbia. Finally, there is opportunity for presenting scientific work during abstract presentations.

Military Medical Academy and Hotel M as main places of the BAC 2014 happenings are opening their doors to you and we hope that you will enjoy our hospitality, pleasant surrounding and positive atmosphere to enrich your knowledge.

Take advantage of BAC 2014 and enjoy autumn in Belgrade!

LiDCOrapid^{v2} with Unity Software for peri operative monitoring

LiDCOrapid^{v2} allows you to safely monitor any surgical patient, anywhere in the hospital, at any point in the care pathway.

From simple continuous non invasive blood pressure monitoring to advanced hemodynamic parameters and depth of anesthesia monitoring. You choose how, and where, to monitor your patients.

Multi modal monitoring with the LiDCOrapid^{v2} monitor and BIS™ depth of anaesthesia "reduces dramatically the requirement for postoperative high dependency management with only 8% of patients requiring admission to HDU."
